

## 2016 Accomplishments

1. Six sites in network enabled the conservation of approximately 3,000 acre-feet of water and recharging 2,700 acre-feet to the aquifer near the San Pedro River.
2. Completed transfer of land from TNC to Cochise County for two sites.
3. Added new member (City of Bisbee).
4. Operated 2<sup>nd</sup> year of Palominas Recharge Project.
5. Secured funding and began Phase 2 recharge investigation at Bella Vista.
6. Established surface water and/or groundwater monitoring network at 4 sites, completing baseline monitoring for all 6 sites in network.
7. Prepared a General Work Plan for Implementing Aquifer Recharge Projects in the Sierra Vista Subwatershed.
8. Prepared preliminary cost estimates for full buildout of CCRN recharge network.
9. Explored funding opportunities with federal agencies and impact investing.
10. Applied for two grants from external funding sources and developed materials to support future grant applications.
11. Updated Sierra Vista Subwatershed groundwater model and projected benefits of recharge network on baseflow of the San Pedro River.
12. Helped secure \$1M in private funding and completed final design for Horseshoe Draw Stormwater project and engaged federal elected officials in DC and local staffers.
13. Coordinated with the Upper San Pedro Partnership Technical Committee on scientific findings.
14. Participated in workshop with stakeholders in Verde River watershed to exchange information and experiences.
15. Gained federal recognition of Cochise Conservation and Recharge Network in the federal Defense Reauthorization bill.
